

Lancers MVP UX - Approved Workflow Contract

Sanitized desktop and phone wireframes in end-to-end workflow order

Canonical contract: docs/ux/slice-ux.md

Registered screens: 49

Standalone SVGs: 98

Approval: Brian - 12 August 2026

Status: approved workflow direction; publication still requires explicit authorization

All displayed people, contact details, statuses, responses, and attendance records are synthetic and do not correspond to real members.

LAN-90 approval comment: linear.app/brian-schuster/issue/LAN-90#comment-44f1c4de-cc9f-4708-86b3-b2ba555bf960

Notion approval record: app.notion.com/p/3ba48886d5781ed9adedd53635d1c6f

Synthetic scenario data - no displayed person, contact detail, status, response, or attendance record corresponds to a real member.

Publication review - approved, sanitized package

- All 49 stable screens have a route, audience, owning Linear issue, desktop SVG and 375px phone SVG.
- Brian approved the workflow direction on 12 August 2026 in the linked LAN-90 comment and Notion record.
- All displayed people, contact details, statuses, responses and attendance records are synthetic.
- The supplied master roster produced no matching name or contact value in the sanitized Markdown or SVG sources.
- UX-63, UX-64 and UX-65 preserve distinct internal states but use one indistinguishable public 404 response.
- UX-66 remains the valid-invitation cancellation exception; LAN-110 remains attendance-only and occurrence-gated.
- Relative links, screen registry, ticket traceability and responsive presentation pairs were revalidated.
- Publication, draft-PR creation and LAN-90 closure remain blocked until Brian explicitly authorizes them.

LAN-90 approval: linear.app/brian-schuster/issue/LAN-90#comment-44f1c4de-cc9f-4708-86b3-b2ba555bf960
